OBJECTIVE

Computer Science undergraduate with hands-on experience in full-stack development (React, Node.js, Express, MongoDB) and building AI-integrated applications. Looking for Software Development roles to keep learning and contribute to real projects.

SKILLS

Languages: Java, Python, JavaScript, SQL, HTML, CSS

Frameworks / Tools: React, Node.js, Express.js, MongoDB, Tailwind CSS

Concepts: OOP, Data Structures & Algorithms, DBMS, Real-Time Communication, Responsive Web Design

Core Skills: Problem Solving, Debugging, Rapid Technology Adaptation, Communication

EDUCATION

Bachelor of Technology in Computer Science and Engineering

Expected 2027

Dr. Babasaheb Ambedkar Technological University (DBATU)

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Operating Systems, Computer Networks.

INTERNSHIP EXPERIENCE

Data Science Intern

July 2024

Cluematrix Technologies Pvt. Ltd.

- Worked on data handling and processing tasks as part of ongoing analytics projects.
- Used analytical methods to help improve workflow efficiency across projects.

Python & Machine Learning Intern

Aug 2025 – Sep 2025

Anishree Technologies LLP

- Used Python, NumPy, Pandas, and Scikit-learn for data preprocessing and building ML models.
- Built and tested classification and regression models on real-world datasets.
- Picked up debugging and problem-solving skills through hands-on tasks.

PROJECTS

AI Legal Document Analyzer

React (Vite), Node.js, Express, MongoDB

- Built a full-stack platform that lets users upload legal PDFs and get clause-by-clause AI risk analysis
- Implemented a RAG-based Q&A pipeline so users can ask natural language questions about their uploaded documents and get context-aware answers.
- Designed the backend with Node.js, Express, and MongoDB to handle PDF parsing, chunking, and storage across the analysis pipeline.
- Built the frontend with React (Vite) and Tailwind CSS for a clean, responsive user experience.

Face Recognition Attendance System

Python, OpenCV, Tkinter, Pandas

- Built a desktop attendance system in Python using OpenCV for real-time face recognition.
- Automated student registration, dataset generation, and LBPH model training.
- Built a Tkinter GUI for attendance management.
- Stored attendance records in CSV while preventing duplicate entries.

CERTIFICATIONS

- AWS Solutions Architect Virtual Experience – Forage
